Geometric Construction

Cast iron takes its shape from the mold, not from a hammer and an eye. Every curve came from a parameter, then finished by hand.

Съешь ещё этих булок · Բել դյուլ Պանը · ψωμί και τυρί

A geometric sans from parametric first principles. Six optical sizes from Micro to Grand, axes for weight, condensity, oblique and optical size, small caps and oldstyle figures. Latin, with Cyrillic, Greek and Armenian in beta.

RetroChunki

FREE · SIL OFL

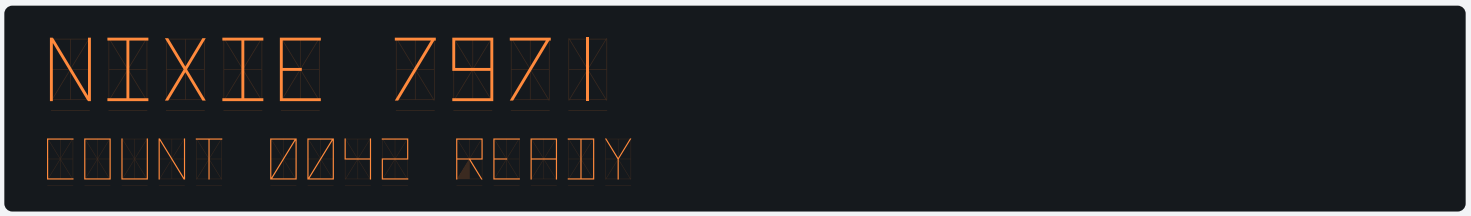

A sixteen-segment display face: capitals, figures and a slant axis in four weights, with an unlit twin for every character.

castirontype.com/typefaces/retrochunki

Anokath

FREE · SIL OFL

A fourteen-segment display face after the Burroughs B-7971 neon tube: capitals, figures and symbols in four weights, with an unlit wire cage.

Wobblesam

FREE · SIL OFL

Peekaboo! I see you.

Back by six. Feed the cat!

A felt-marker alphabet in which most of the letters look back at you, in four weights, each letter drawn three times so a doubled letter never repeats.
